Dear Sir:

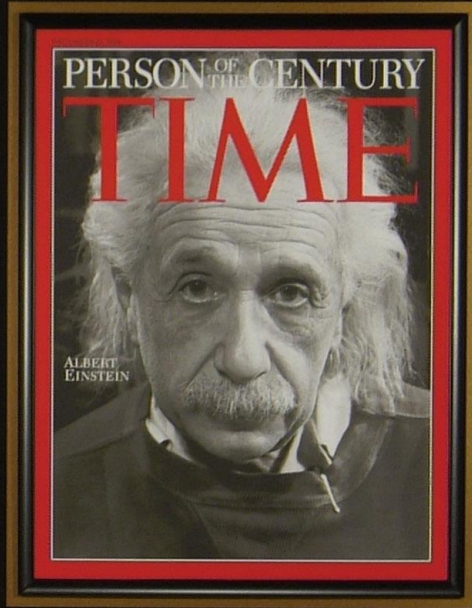

I received your letter of December 1st.

I have no objection if Mr. Thun wants to sell the portrait  
he made of me to you or your friends.

Sincerely yours,

*A. Einstein.*

Albert Einstein.

"I have long been a part of the whole called by us science, a part limited in time and space. It requires thought, an insight and feeling, an something essential for the rest of the world of natural sciences. The science is a kind of game for us, entering us in personal desire and is effective for a few years around us. We will need to be rescued from the game by releasing our circle of concerns to include all living creatures and the whole of nature in its being."
